SCOPE OF SERVICES

1.1 Introduction

The University of Maryland, Baltimore County is requesting proposals from firms to provide two (2) identical MRI magnets. The magnets are not for medical application and will not be used with human subjects.

1.2 Background

Established in 1966, the University of Maryland, Baltimore County (UMBC) is one of twelve institutions that along with two regional centers constitute the University System of Maryland. UMBC is located on 482 acres with 4.2 million gross square feet and only 15 minutes from Baltimore's Inner Harbor and 30 minutes from Washington, D.C. and five minutes from BWI Airport.

UMBC combines the emphasis on teaching found at the best liberal arts colleges with the innovation of a research university. UMBC's students take full advantage of the educational, business, cultural, and recreational resources of Baltimore and Washington, D.C. At UMBC, students work alongside faculty who are leaders in their fields; think about the hard questions of society, science, and creative expression; and then move beyond the classroom to make a difference.

UMBC is increasingly recognized as a major resource for building the State's economy and addressing its social concerns. More than 70% of UMBC's 77,000 active alumni live and work in Maryland, contributing significantly to the State's economic and social vitality. In Fall 2019, UMBC had 13,602 enrolled students of which 49.8% are minority enrollments from nearly all 50 states and 3% are international enrollments from more than 80 nations, creating a richly diverse student body. UMBC's research expenditures totaled \$90M for fiscal year 2019.

UMBC continues to be recognized for its academic program, innovation, value and campus environment including the following recent rankings:

- *U.S. News & World Report* has again named UMBC a leading U.S. university: the #9 most innovative university and #12 top university for undergraduate teaching in the nation.
- *Times Higher Education* has recognized UMBC as one of the world's top universities. In a new THE impact ranking, UMBC is #3 in the U.S. and #62 worldwide in global social and economic impact.
- The latest *U.S. News* Best Graduate Schools rankings include several UMBC graduate programs as among the best in the nation.
- UMBC is the nation's #1 producer of African American undergraduates who go on to complete an M.D./Ph.D. and #2 nationally for African American undergraduates who complete a science or engineering Ph.D.

- According to NSF, UMBC ranks in the country's top 150 universities in federal research and development expenditures, and #12 in NASA funding.
- UMBC placed in top 3.3% of universities worldwide by the Center for World Universities Rankings (CWUR).
- UMBC is named a 2019-2020 Fulbright Top Producing Institution, an honor granted by the U.S. Department of State's Bureau of Educational & Cultural Affairs.

1.3 MRI Magnet Specifications

This document provides the minimum specifications and requirements to be met by the selected firm. By this reference, the University expressly reserves the right to amend, modify, and reissue orders, directives, and other instructions pertaining to the responsibilities of the selected firm and other terms as necessary to meet the overall objectives.

UMBC is collaborating with the University of Maryland, College Park (UMCP) on a research project funded by the US Department of Energy. This project requires two (2) identical MRI magnets (same model, dimensions, and operating characteristics) each with a field of 3T (three tesla) for a scientific experiment (high-temperature ionized gases in a chamber within the magnets). As stated in the introduction, the magnets are not for medical applications and will not be used with human subjects. The selected firm shall provide the two (2) magnets, including delivery and installation.

The magnets shall be zero boil-off of helium and shall include all necessary subsystems to ramp the magnets up, keep the magnets running, and ramp the magnets down. The University does not need the RF coils installed or a patient couch, nor does the University require shimming.

The two MRI magnets will be arranged with their bores aligned so that a long cylindrical chamber will fit between both magnets. A schematic of the magnet separation is shown below:

Side view of two magnets with aligned bores, separated by 2600 mm between magnets' inner bores.

The magnets shall be delivered to a laboratory at UMCP, located at 8279 Paint Branch Drive, College Park, MD 20742. This laboratory is located on a ground floor and has a 12 foot bay door. Large trucks and forklifts may operate near the bay door. As the laboratory requires preparatory work, the delivery of the magnets is expected to occur on July 6, 2021. However, the final date for delivery is subject to change and the University will coordinate the final details for delivery with the selected firm.

The selected firm shall deliver, install through anchors in the floor, and power both magnets to maximum field. The force between magnets is expected to be about 42kN (about 9400 lbf) when both magnets are at 3T fields. The University will supply a support structure to be mounted between the faces of the coils, to be installed after magnets have been anchored by the selected firm, and before first magnetic field ramp up.

Site preparation documents shall be provided by the selected firm for the specific MRI model, as well as engineering drawings of the superconducting magnets of the outside vessel only, for the purpose of designing the support structure to be provided by the University, as well as the magnet bore inner diameter.

The magnets' bore clearance shall be at least 860mm (inner diameter) as shown in the figure above. The helium level shall be at least 90% after initial field ramp up.

1.4 COVID-19

Proposers acknowledge and agree that the University is requesting equipment at a time when COVID-19 has disrupted logistics and caused campus closures. Proposers acknowledge and agree that the University shall not be responsible for any delays or damages sustained by the selected firm due to COVID-19. Proposers also acknowledge and agree that the COVID-19 response and evolution of impact is current and ongoing. The selected firm shall comply with all UMCP requirements for conducting business on campus during COVID-19 that are in effect at the time of delivery and installation. The selected firm shall be responsible for all associated expenses for compliance.

1.5 Invoicing requirements

The selected firm shall be paid through electronic funds transfer. Payment by the University may be made at negotiated progress intervals based on work performed by the selected firm and associated payments, with no more than 40% of the total lump sum paid prior to delivery. Invoices shall be submitted with the firm's federal identification number printed on the invoice and due net 30. Charges for late payments other than as prescribed by Title 15, Subtitle 1, of the State Finance and Procurement Article, Annotated Code of Maryland, are prohibited.

PROPOSAL SUBMITTAL

2.1 Introduction

All proposers are required to submit a separate Technical Proposal document from the Price Proposal document. The proposals shall be submitted via email to the Box address provided in the Solicitation Schedule. File names for the documents are to include the RFP number and the Proposer's name and an indication if it is the technical proposal or price proposal.

2.2 Organization of Technical Proposal

All technical proposals shall be organized in accordance with the format listed below. Proposers should describe in detail and provide evidence supporting the qualifications requested below. Conciseness and clarity of content are emphasized and encouraged. Vague and general proposals will be considered non-responsive and may result in disqualification. Non-conforming and non-responsive proposals may be rejected at the discretion of the University's Procurement Department.

Technical Proposals shall be organized in the following format:

- Title page
- Equipment specification
- Profile of Proposer
- Delivery and Installation
- Acknowledgement of Addenda form
- Bid/Proposal Affidavit
- Other

Failure to include all the documents may render the proposal non-responsive and the offer may be rejected.

2.3 Title Page

The title page shall be on company letterhead and include the name and address of the firm submitting the proposal, a contact person at the firm for the proposal, including complete telephone number with extensions and email contact information. The page shall also include the RFP title and number, as well as the date of submission. The title page shall be signed by an individual who is authorized to bind the Proposing firm to all statements, including services, and financials, contained in the Proposal.

2.4 Equipment Specifications

Provide the specifications for the two magnets to be supplied. Provide the necessary lead time for the equipment. Indicate any testing or preparation that is performed by the Proposer prior to shipping. Include any drawings or other technical information that demonstrates the technical performance of the magnets.

2.5 Profile of Proposer

Provide a brief but informative history of the firm inclusive of how the firm was established and how the firm has developed/evolved over the years. Indicate the type of equipment supplied, the client base, and the year in which the firm commenced services and on what types of equipment initially.

Submit three (3) references of entities that were supplied similar equipment. Provide a reference contact for each of the three (3) entities, including contact name, address, telephone number including voice mail prompts or extension, and email address for each reference. References are to be from different entities; that is, only one reference per entity is allowed. Please be sure that accurate information is provided and that the contact person can speak to your firm's capability in supplying the equipment required. References will be held in the strictest of confidence. Higher consideration will be provided to references from Higher Education institutions.

The University reserves the right to verify all information provided if it so chooses, as well as to check any other sources available or to use itself as a reference if not provided by the Proposer.

2.6 Delivery and Installation

Describe the installation requirements for the magnets. Will the installation be performed by employees of the Proposer or a subcontracted firm? If the work is to be performed by a subcontractor, provide the name of the firm and relevant qualifications. Explain the relationship between the Proposer and the subcontractor, as well as oversight that will be provided by the Proposer during the installation. Provide any electrical and water requirements for the system that need to be in place prior to installation, as well as any other applicable requirements for the laboratory space.

2.7 Bid/Proposal Affidavit

The Bid/Proposal Affidavit included in this RFP document must be executed by each responding proposer and submitted with the proposer's technical proposal.

2.8 Price Proposal

As a separate document, provide a price proposal for the two (2) the magnets. The price shall be a lump sum price to include breakdown of the different cost components. Included within the lump sum price shall be the cost for all storage, freight, and other delivery charges; the University will not pay additional charges for these items beyond the lump sum amount. Additionally, the University is a tax exempt entity, which shall be expressly acknowledged and indicated on the price proposal.

EVALUATION PROCESS

3.1 Evaluation Overview

Proposals must meet the requirements as stated in this document. Proposals that fail to meet one or more of the criteria may be ineligible for award. The University may make any investigations deemed necessary to determine the ability of the firm to provide the work as specified herein.

The solicitation evaluation involves an iterative evaluation process through a number of different phases by an evaluation committee. The technical evaluation encompasses the review of the written technical proposal. The price evaluation is the review of the price proposal separate from the technical evaluation. All firms will be notified if they do not meet the requirements for a particular phase. The final proposal rating will be based on the technical evaluation and the price proposal evaluation. Technical merit will have a greater weight than cost.

The University will choose from among the highest rated proposals the proposal which will best serve the interests of the University and the State, in accordance with University procurement policies. The University reserves the right to negotiate or modify any element of the request for proposal evaluation process to secure the best possible arrangement for achieving the stated purpose. The University reserves the right to make an award with or without negotiations. The final decision will not be based upon price alone.

3.2 Technical Evaluation

A Technical Evaluation of the Technical Proposals will be conducted by a University Selection and Evaluation Committee. The Committee shall conduct its evaluation of the technical merit of the proposals in accordance with the evaluation criteria. In general, proposals submitted in response to this RFP must demonstrate that the firm is able to successfully provide two identical magnets as required for the experiment. Higher consideration shall be given to proposers whose firm profile and references illustrate that the proposer has the resources available to successfully deliver the magnets within the required parameters.

Proposals are evaluated to determine which proposal is most advantageous to the University. The process involves applying the evaluation criteria in the RFP. Based on the results of the technical evaluation, the University will develop a short list of firms that are deemed most qualified to deliver the equipment required under this Contract who will advance in the procurement. Those proposers not deemed susceptible of the award and not shortlisted will be advised and will not progress further in the procurement.

Further information may be requested by the University during the technical evaluation process and a Best & Final Technical phase may be conducted.

3.3 Price Evaluation

After completion of the Technical Evaluation, the submitted price proposals for only those Proposers who remain shortlisted based on the technical evaluation will be evaluated. Price Proposals will not be opened publicly.

The University may elect to request Best & Final Price Proposals.

4.17 Maryland Public Ethics Law

The Maryland Public Ethics Law prohibits, among other things: State employees or officials (and in some cases, former employees) and businesses in which such an individual is employed or holds a financial interest from (i) submitting a bid or proposal, (ii) negotiating a contract, and (iii) entering into a contract with the governmental unit with which the individual is affiliated per the Maryland Code, General Provisions Article, Title 5, Subtitle 5.

Contractor agrees that any affiliated entity receiving such payments is doing business in Maryland and is required to file Maryland income tax returns. Contractor agrees that during the course of this contract: (1) it shall not make any such royalty or similar payments to any affiliated company; but (2) if any such royalty or similar payments are made, contractor and the affiliated company shall file separate Maryland income tax returns and pay their respective Maryland income taxes in such a manner that contractor may claim a

deduction against Maryland income tax for such payments only if the affiliated company receiving the royalty or similar payment files its Maryland income tax return and pays Maryland tax, under a formula that reasonably apportions the income of the affiliated company among the states, including Maryland, in which the contractor does business. Contractor agrees that it is authorized to bind its affiliated entities to the terms hereof.

4.19 Payments to Contractors by Electronic Funds Transfer

If the annual dollar value of this contract will exceed \$200,000.00, the Proposer is hereby advised that electronic funds transfer (EFT) will be used by the State to pay the Contractor for this Contract and any other State payments due Contractor unless the State Comptroller's Office grants the Contractor an exemption.

By submitting a response to this solicitation, the Proposer agrees to accept payments by EFT. The selected Proposer shall register using form GAD X-10 Vendor Electronic Funds (EFT) Registration Request Form. Any request for exemption must be submitted to the State Comptroller's Office for approval at the address specified on the GAD X-10 form and must include the business identification information as stated on the form and include the reason for the exemption.

The form is available as a pdf file on the web site of the General Accounting Division of the Comptroller of Maryland: <https://www.marylandtaxes.gov/divisions/gad/eft-program.php>
